Professional Summary

Experienced full stack developer with 7 years of proven success in building scalable backend APIs and frontend web applications. Proficient in JavaScript frameworks including React, Node.js, and Express. Recognized for consistently producing clean, well-organized, and reusable code. Seeking a senior full stack position to leverage expertise in design and development.

Work Experience

Full Stack Developer, Terra Systems Pte Ltd 05/2022 – present | Singapore

- Prepared complex user interfaces and data interactions within a strict deadline in collaboration with 20+ designers and 50+ developers
- Discovered an ignored flaw in a software package and reported it to senior management; saved the company \$20K annually in maintenance costs.
- Improved 10 existing e-commerce products, developed 9 new e-commerce products and applications, resulting in a diversified product line and an 75% increase in website revenue.
- Oversaw and completed numerous major new client on-boarding procedures with external partners.

Full Stack Developer, Asticom Technology 07/2019 – 04/2022 | Philippines

- Managed 10 time-sensitive updates, including content changes and database upgrades.
- Planned, wrote, and debugged 5 web applications and software with complete accuracy.
- Enhanced 12 app integration with REST / SOAP and other APIs for Google Maps, social media logins, payment processors, and other services.
- Implemented AWS to allow 15 easy iterations in company cloud infrastructure.
- Overhauled coding standards and boosted productivity in the IT department by implementing 40+ innovative procedures.

Front End Developer, Techtronic Industries 08/2015 – 06/2019 | HongKong

- Led development team of 5 to create GitHub pages, allowing customer repositories to be hosted directly.
- Enforced code quality across the React codebase with ESLint, resulting in a 21% reduction in code review time and improved overall codebase health
- Progressed and implemented 5 React components using React Router to enhance navigation UX.
- Created new documentation for MaterialUI that prevented the need for a 3-week onboarding course.
- Introduced Kanban Board style ticketing system to promote highly efficient asynchronous and synchronous work, increasing efficiency by 12%.
